Passionate full-stack developer with experience in React, TypeScript, and Node.js. Strong in agile workflows, handling both frontend and backend tasks. Eager to build scalable, high-quality solutions and drive impactful projects.

Skills

Languages	TypeScript, JavaScript, Java, Kotlin, Python
Technologies	React, Node.js, Spring Boot, PostgreSQL, MongoDB, AWS, Azure, Kafka, GraphQL, Git, AI

Work Experience

Full Stack Developer — Samokat.tech — Sep 2023 – Oct 2024

- Worked on the backend using Kotlin and Spring Boot, helping launch features 20% faster.
- Created and documented automated tests, saving 30% of QA time and speeding up releases.
- Streamlined frontend and backend integration, halving development time for new features.
- Rewrote frontend CI/CD scripts from Python to JavaScript, simplifying maintenance.
- Built the frontend for another team's MVP using React and GraphQL, helping them finish on time.

Frontend Developer — Samokat.tech — Apr 2023 – Sep 2023

- Built a back-office tool for logistics using React, reducing support tickets by 10%.
- Worked with designers to improve UI/UX and added client feedback to make it easier.
- Helped another team finish frontend tasks and align code with standards.
- Integrated with teams to centralize data, improving UX and saving users time.

Frontend Developer — Involta — Jun 2019 – May 2020

- Developed responsive and user-friendly landing pages using HTML, CSS, and JavaScript.
- Added new features to the internal CMS tool using JavaScript and API integrations.
- Implemented a redesign for an internal task manager, improving usability and workflows.
- Maintained and supported existing websites, fixing issues and improving performance.

Web Developer   **Drozzi**   Jan 2019 – Jun 2019

- Built landing pages using HTML/CSS and native JavaScript.
- Managed and updated projects with the WordPress CMS.

Education

Full Stack Web Development   University of Helsinki   Dec 2024 – Dec 2024

Bachelor's degree, Information   Ivanovo State Polytechnic University   Sep 2017 – Sep 2019
Technology

Projects

Full Stack Developer   **MyDuo**   Mar 2022 – Jan 2023

- Made a Duolingo-like app where users can complete lessons.
- Added a "Constructor" page so users can create their lessons and steps.
- Used React, TypeScript, MongoDB, and Remix to build a fast and easy-to-use app.
